American Medical News

Index

Volume 24 - 1981

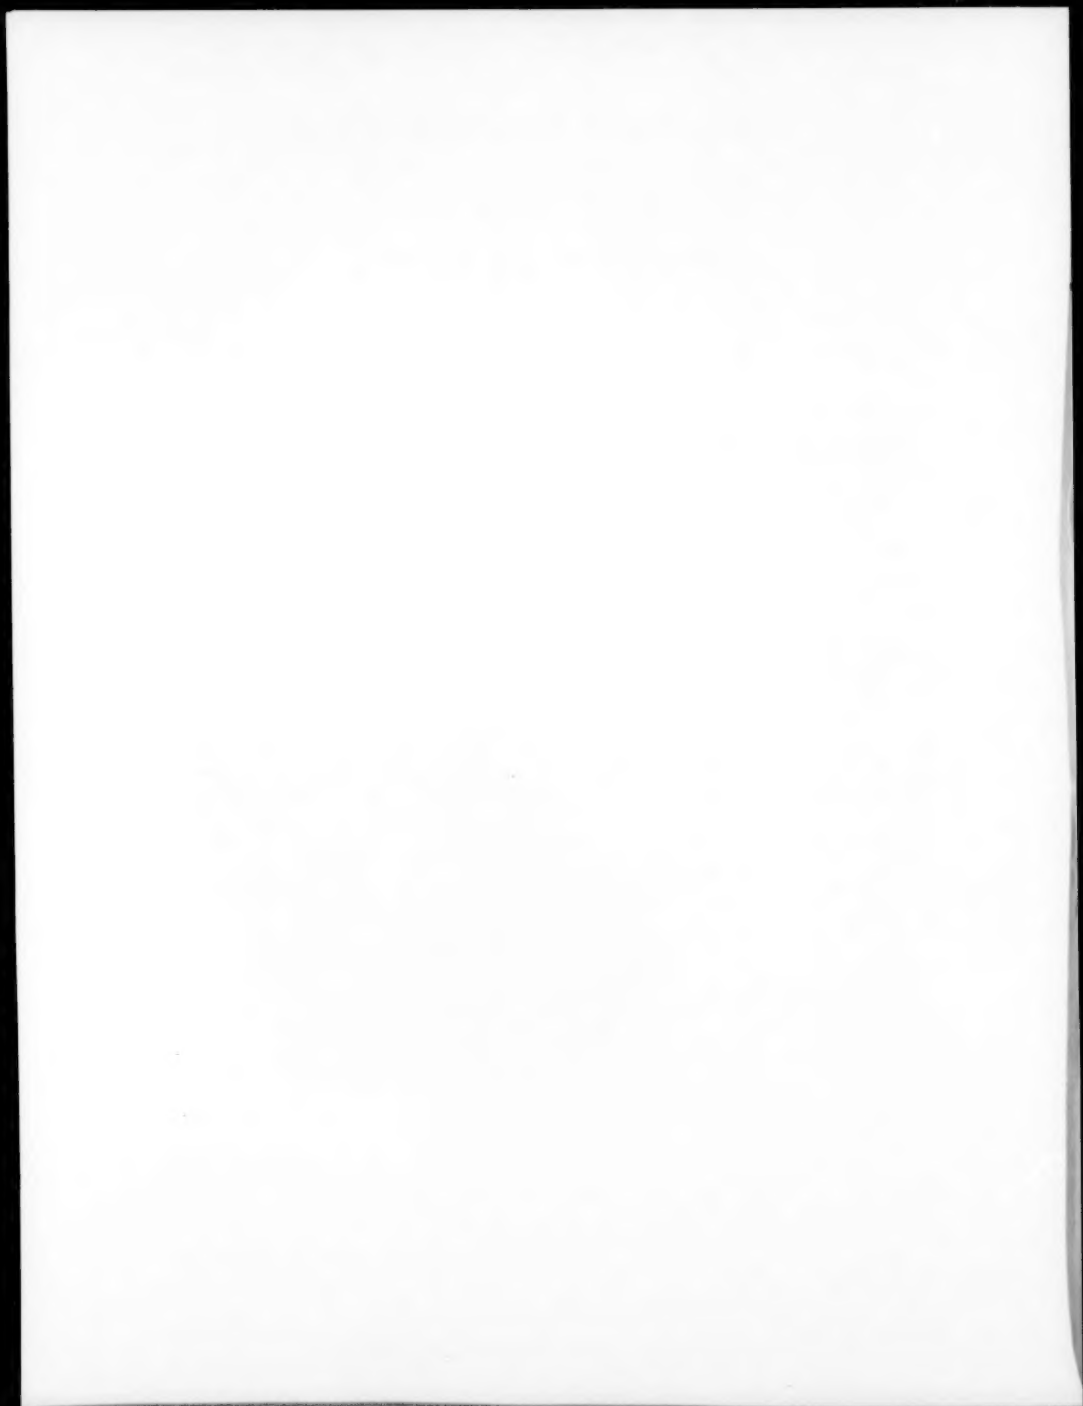

American Medical News (AMN) reports on events affecting the medical profession and on the activities of the AMA. Every attempt is made to report accurately, concisely, and responsibly, in an effort to present all sides of an issue.

Of the three editions of AMN, only the one-star and three-star editions are indexed. Most articles are indexed, including brief items under MEDICINE'S WEEK. Not indexed are THIS WEEK IN JAMA, PROJECT USA, and product advertising. Names of individuals about whom articles are written are included in the subject index. Names of authors of letters and of Impact articles are also included in the author index.

Citations give date of issue and page number of the three-star edition. If an article is contained only in the three-star edition (***) or in the one-star edition (*) this fact is noted in the citation. Impact was no longer published after July 1981.
